List of Perfumes For The Ethnos Innate Group

April 27, 2025

A list of all perfumes for the innate group Ethnos, which is based on the smells of real perfumes. This list was collected and compiled by the authors of this typology and website in order to show the theoretical relationship of real perfume smells with a certain innate group, type, temperament and

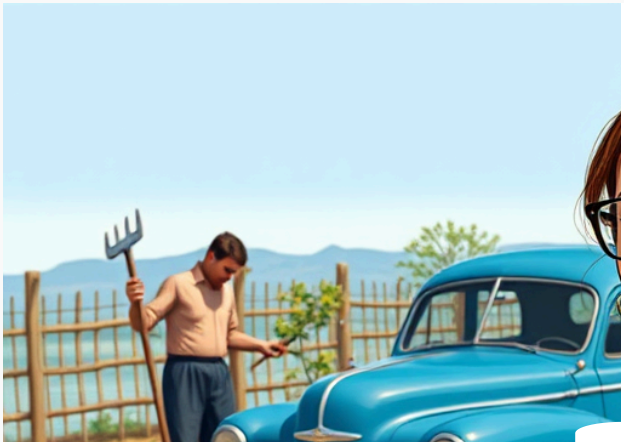
even the age of the type. This list of perfumes is an extension of the page *"A Typological Classification Of Perfumes For Innate Types"*.

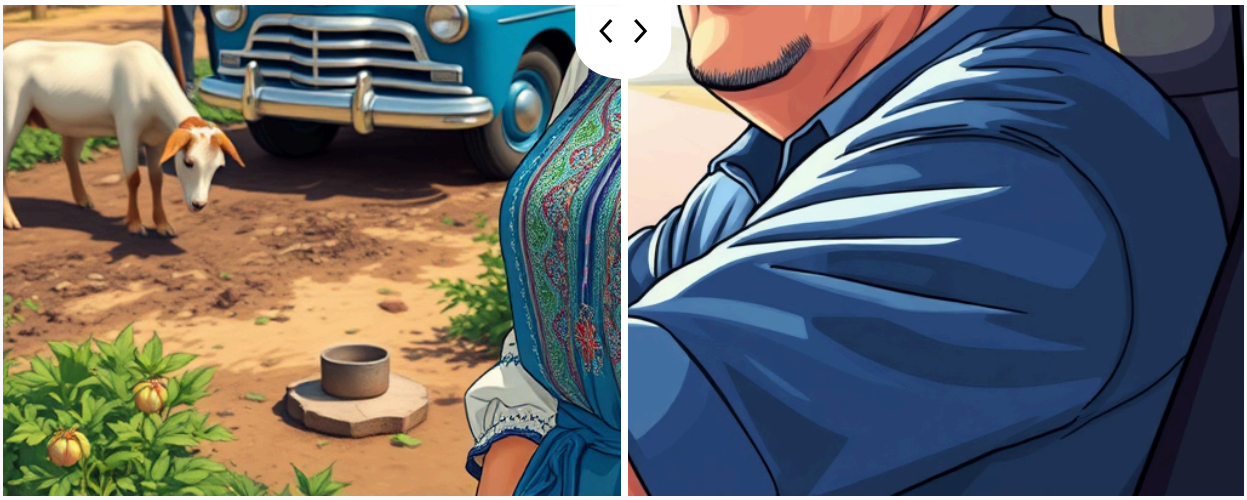
Perfumes were invented by mankind long ago for the purpose of pleasing themselves and the people around them. Odors give mood, stimulus to life, perhaps help to improve mental state or fight stress as some others believe. Perfumes are the most persistent of all perfumes as they are made up of a higher percentage of essential oils, while toilet water and colognes have less essential oils in their composition. But in the composition of some perfumes are not only natural essential oils, but also synthetic components that perfectly replace or complement some odors that are difficult or impossible to extract from natural components. Therefore, different perfumes have a different smell and create their own image and atmosphere, which in theory have a connection with typology. For this purpose, we have made a typological classification of perfumes.

Note, that we do not partner with perfume brands and we do not sell their perfumes. This list includes perfumes, toilet water or colognes. These perfumes are marketed to all people without exception. Therefore, this list of perfumes is not a recommendation for you. You are well aware that you can choose any perfume you want.

The Basis For Categorizing and Selecting Perfumes For Ethnos

Fragrances are classified by us manually and subjectively, according to **innate type of thinking** and also selected according to **innate temperament** (sanguine, choleric, phlegmatic and melancholic) defined by us and **theoretical types age** (young, middle, old). If you are interested in whether perfumes and scents are created for men, women or unisex, then you will have to look for this information on the websites of manufacturers.





Slide the image of the Ethnos left to right.

“Work is more important than anything else, that is the meaning of life and strength.”

The Motto of the Ethnos group.

Search fragrance by brand or name (if you know it)
